

## Float\_Flying\_BCRCC

Float Flying - Normally this is done on the third Sunday of each month, The Benton County Radio Control Club (Adair) does a monthly float fly at a pond just south of Corvallis. Especially during the summer months, this can be a great time to enjoy a change by demonstrating your skills flying off of water. Last summer we initiated an Associate Member program for members of other local clubs, allowing AMA members to fly with us. The Associate Membership is \$10 per year. Normally this is done on the third Sunday of each month, starting at about 9:00 in the morning. It is a private pond but is an AMA approved site with agreement between our club and the Corvallis airport. As a private property we fly with the permission of the owner for members only which gets granted each month. The current coordinator is Jeff McNutt and he sends out a reminder each month. This month it conflicts with Easter Sunday so it's being moved to the next Sunday, the 23rd. If you're interested in joining us at the pond, give Jeff a call at 541 738 6001 or call/email Dave Young our Secretary at 541 760 6290, email 3oregon@comcast.net.

Regards,  
Dave Patana, President
